ranch \$100

Each add. ranch \$60

Includes Lunch

8:30 AM — 5:30 PM
under 12 \$20 for lunch

HOSTED BY
BRUCE, LEEANN
TAYLOR WAUGH
AND DOUG WARD

Location
14495 390th St.
Goodhue, MN 55027
507-298-0820

Cattle

- The Solo Cup Cow: how a better shape makes all the difference in fertility and easy keeping
- Reading animal hair coats and shape to assess her fertility, butterfat, tender meat.
- Ways to promote reproduction, growth and longevity

Minerals

- How to tell if the minerals you are using are toxic and what to do about it
- How and when to use natural products (baking soda, clay, sea salt and apple cider vinegar) and what to avoid

- **Steve Campbell** will cover: how phenotype, butterfat/glandular function, & weaning age affect the keeping costs of a cow for the next 10+ years; how to know, before you buy, what a particular bull can do. Low-cost epi-genetic fixes so your cattle can express the best of the genetics you already own. Epi-genetics = the Air, Water, Grass and MINERALS your livestock consume.
